

KORONA

Large-grain buckwheat

KORONA

The earliest large-grain buckwheat on the market

Early vigor

Very good

Yielding

Very high

Earliness

Very early

Milling quality

Very good

Varietal Identity

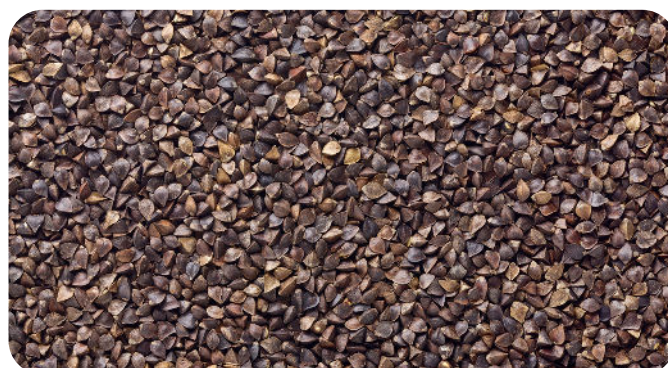

TYPE	Large-grain buckwheat
GENETIC TYPE	Inbred line
USE	Milling, Hulling and Birdfood
REGISTRATION	France 2023

Technological Identity

GRAIN TYPE	Large grain
GRAIN COLOR	Black
MILLING QUALITY	Very good
TKW	27 to 30g

Agronomical Identity

	LOW	QUITE LOW	MEDIUM	HIGH	VERY HIGH
YIELDING	—	—	—	—	—
EARLY VIGOR					Very good
FLOWERING EARLINESS					Very early
MATURITY EARLINESS					Very early
HEIGHT					Medium
LODGING					Low susceptibility

PRODUCT MANAGER'S OPINION

KORONA is the earliest high-potential variety on the market. Due to its short cycle, **KORONA** can be sown as a main crop, catch crop, or after an intermediate energy crop. Its early maturity and semi-determined flowering secure the harvest and the grain quality.

Cultural Identity

- **Density target :** 250 plants / m²
