

# MAPLUS

Maple Pea

## MAPLUS

The maple pea with high protein content for birdfood and human food

### Early vigor

Very good

### Yielding

Very high

### Earliness

Mid-early

### Grain quality

Very good

## Varietal Identity

**TYPE** ————— Maple pea  
**GENETIC TYPE** ————— Inbred line  
**USE** ————— Birdfood, Food Industry

**REGISTRATION** ————— EU, 2023

## Technological Identity

### PROTEIN CONTENT\*

25,5%,  
VERY  
HIGH

**GRAIN COLOR** ————— Marbled brown

**TKW** ————— 240 - 260 g

\*From registration trials

## PRODUCT MANAGER'S OPINION

**MAPLUS** is a new maple pea variety with early to mid-early flowering and a strong yield potential equivalent to market references. Its seed quality and high protein content makes it perfectly adapted to the industry requirement

## Agronomical Identity

LOW      QUITE LOW      MEDIUM      HIGH      VERY HIGH

### YIELDING

### FLOWERING EARLINESS

Early to mid early

### MATURITY EARLINESS

Mid early

### EARLY VIGOR

Very good

### HEIGHT

Tall

### LODGING

Low susceptibility

## Sanitary Identity

### DISEASE BEHAVIOUR

Good

## Cultural Identity

- **Density target:** 80 to 100 plantes/m<sup>2</sup>
