The new high-yielding potential erucic rapeseed

Autumn development

Very good

Yielding

Very high

Earliness

Mid-early

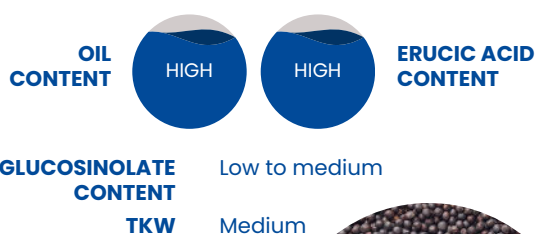

Erucic acid content

High

Varietal Identity

TYPE	Winter oilseed rape "HEAR"
GENETIC TYPE	Restored hybrid
USE	Oil industry
REGISTRATION	EU, 2024

Technological Identity

PRODUCT MANAGER'S OPINION

REACTIV delivers a very high yield level in the erucic rapeseed segment. It is a vigorous hybrid with strong establishment, mid-early flowering and maturity.

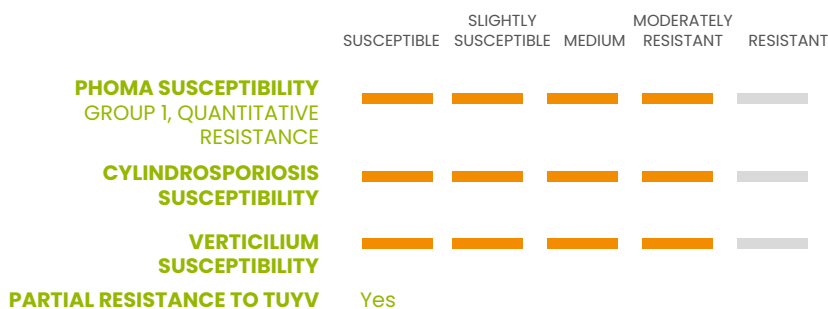

Its excellent yield potential, combined with good overall agronomic performance, makes **REACTIV** a perfect fit for market expectations.

Depending on the agroclimatic conditions of the year, a growth regulator is recommended in the fall
