

ID SUNBIRD SII

Small Striped Sunflower hybrid

ID SUNBIRD SII

The reference of small-striped sunflower variety for birdfood

Earliness
Early to mid-early

Yielding
High

Verticillium
Very low susceptibility

Grain quality
Very good

Varietal Identity

TYPE	Small striped kernel
GENETIC TYPE	Single cross hybrid
USE	Birdfood, Crushing and Hulling
REGISTRATION	EU

Technological Identity

OIL TYPE	Linoleic
KERNEL TYPE	Black kernel with white stripes
KERNEL SIZE	~12,58 x 5,62 mm

PRODUCT MANAGER'S OPINION

ID SUNBIRD SII is a consistent variety with strong emerging vigor. It delivers a very high yield in all conditions, combining a good disease resistance profile and excellent seed quality for birdfood.

Agronomical Identity
